## We Certify: A Web-Based Effort Certification System For Non-Profit Organizations

We Certify is a web-based effort certification system, specifically designed for non-profit organizations to ensure compliance with Federal regulations. If your organization receives Federal funding, either directly, or from a pass-through, **you are already** required to comply with the provisions of OMB Circular A-122.

### This Product is for You

Meeting Federal requirements can be complex, time-consuming, and costly. We Certify provides an affordable, compliant, easy-to-use effort certification system that will safeguard your organization against potential effort certification audit disallowances.

Either by virtue of not understanding the complex regulations, or simply lacking resources, non-profits commonly struggle with effort reporting and its concepts. We Certify provides an easy-to-use, customizable solution designed to achieve compliance without specialized training or expensive software. Health Research, Inc. (HRI) consulting and training services are also available to support individual time and effort projects.

Health Research Inc., is a not-for-profit, 501 (c) (3) corporation that is committed to the support of public health and scientific research programs. HRI provides excellence in grants management and technology transfer, delivering the benefits of health programs and science to the public worldwide. Since 1952, HRI's successful grant development and management solutions have resulted in more than \$7 billion in funding awards.

"So easy, I feel like I did something wrong."
